

GOODBOARDS

COLOURFUL OPTIMISTIC

COLLECTION 24 | 25

HANDMADE IN EUROPE

FROM PREMIUM MATERIALS

LIMITED SERIES

EST. 2010 DURABLE | POWERFUL AMMERSEE

Barbara Hemund, Pitztal, Swen Michalzik

In der farbenfreudigen Kollektion 2024-25 spiegelt sich unsere optimistische Einstellung, die einen großen Einfluss auf unser Wohlbefinden hat. Das positive Denken hilft uns Herausforderungen zu meistern, uns auf das Gute zu konzentrieren und das Beste aus jeder Situation zu machen, anstatt uns von negativen Gedanken überwältigen zu lassen.

Snowboarding macht auch nach 35 Jahren richtig viel Spaß.

Hochwertige Snowboards aus Premium-Materialien, die in europäischer Handarbeit gefertigt werden, sind teurer, aber langlebiger, schonen die Umwelt und machen vor allem die Kunden glücklich. Das positive Feedback von zufriedenen Kunden gibt uns noch mehr Kraft und bestätigt, daß wir uns auf dem richtigen Weg befinden.

JOIN THE GOOD WAY

The colourful collection 2024-25 reflects our optimistic attitude, that has tremendous effect on our wellbeing. Positive thinking helps us to master challenges, to focus on the good and to make the best out of every situation, instead of being overpowered by negative thoughts.

After 35 years snowboarding still makes a whole lot of fun!

It's true. Top quality snowboards made of premium materials, produced by European handwork, are harder to sell, due to increased prices. The longevity with short transportation routes though are clearly so much better for the environment. And on top of that, goodboards make snowboarders and retailers/dealers happy! The positive feedback from satisfied customers provides us more power and energy and reassures us, that we are on the right path!

JOIN THE GOOD WAY

La collection 2024-25, riche en couleurs, reflète notre attitude optimiste. Elle a une grande influence sur notre bien-être. Notre pensée positive nous aide à relever les défis, à nous concentrer sur les bonnes choses et à tirer le meilleur parti de chaque situation, plutôt que de nous laisser submerger par les pensées négatives.

Ainsi, après 35 ans, le snowboard reste un plaisir.

Des snowboards de qualité, fabriqués avec des matériaux premium et de manière artisanale en Europe, sont certes plus chers, mais ils ont une durée de vie plus longue, préservent l'environnement et, surtout, rendent les clients heureux. Les retours positifs de clients satisfaits nous donnent encore plus de force et confirment que nous sommes sur la bonne voie.

JOIN THE GOOD WAY

PREMIUM MATERIALS

FOR POWERFUL AND DURABLE BOARDS

SINTERED

GRAPHITE BASE

BASALT

DOUBLE WOOD CORE

Gesinterter Graphit Belag - ist härter und damit robuster, nimmt wesentlich mehr Wachs auf und besitzt hervorragende Gleiteigenschaften durch geringere Reibung.

Sintered graphite base - is harder and therefore more robust, absorbs much more wax and has excellent sliding properties due to less friction.

Graphit base - Notre semelle en graphite fritté - est plus dure et donc plus robuste, absorbe beaucoup plus de fart et a d'excellentes propriétés de glisse en raison de la diminution de la friction.

Basalt - ist ein natürlicher Rohstoff aus vulkanischem Gestein. Es besitzt eine bessere Zug- und Druckfestigkeit als Glas, ist aber elastischer als Karbon. Basalt dämpft die Vibrationen, macht die Boards leichter und reaktions-schneller.

Basalt - a natural raw material from volcanic rock. It has better tensile and compressive strength than glass, but is more elastic than carbon. Basalt dampens the vibrations, makes the boards lighter and more responsive.

Basalt - une matière première naturelle issue de la roche volcanique. Il a une meilleure résistance à la traction et à la compression que le verre, mais est plus élastique que le carbone. Le basalte amortit les vibrations, rend les planches plus légères et plus réactives.

Kombi Holzkern - in den Stresszonen-bereichen, bei Inserts und Kanten, ver-wenden wir ein zähes und robustes Holz das schonend mindestens ein Jahr lang an der Luft trocknet. Zwi-schen den Stresszonen liegt ein sehr leichtes Holz.

Combi wood core - we use tough and robust wood that gently dries in the air for at least one year in the stress zone areas such as inserts and edges. A very light wood then lies between the stress zones.

Double Wood Core - Noyau en bois com-biné - nous utilisons du bois résistant et robuste qui sèche doucement à l'air pendant au moins un an dans les zones de contrainte telles que les inserts et les bords. Un bois très léger se situe alors entre les zones de contraintes
